Gerhard is a project manager experienced in implementing turnkey and integrated ERP solutions.

He has managed solution implementations at local and international levels for private and public enterprises.

During his tenure at EPI-USE, he gained technical, business, and interpersonal knowledge that will enable him to support clients with the best business and project management practices.

Gerhard's extensive experience spans over 30 years, during which he has influenced and directly contributed to business transformation through process engineering and project management. This wealth of experience is a testament to his knowledge and expertise.

His international experience in post-conflict countries gives him a unique appreciation for and perspective on our country's socio-economic challenges, and he is keen to continue contributing to addressing these challenges.

Strengths and technical competencies

Gerhard's technical competencies include the following:

- Project Management Institute certified PROJECT Management Professional
- PMBOK, Waterfall, and Agile methodologies.
- SAP HCM and SuccessFactors
- SAP Activate methodology
- SAP ALM

Recent experience

- Gerhard is employed as a Systems Integrator with SPINX property maintenance. In this role, Gerhard is responsible for the configuration and integration of the operational support systems to optimize the process workflow in the company. Systems in use include:
 - Servcraft for job management and workflow
 - Respond.io for customer communications management and
 - Zoho product suite (Cliq and Workdrive) for internal communications and documentation management
- In his role, Gerhard is also involved in overseeing the day to day management of the call centre activities in the organisation.

Education

- UNISA, 1993, Master's degree in Business Leadership
- University of Pretoria, 1982, BSc (Hons) Mathematical Statistics and Operations Research
- RAU, 1980, BSc Mathematical Science

Certifications and other qualifications
